

FireWire® - BORN 2 GRILL

STEEL. HEAT. MEAT – SOMETHING FOR THE GUYS

Broken skewers, splinters and burned fingers. Barbecue side effects. Not with **FireWire®**. U.S. barbecue pros came up with an idea and **revolutionized the grilling skewer** – with **FireWire®**. Finally, a masculine household utensil has been born. **FireWire® is the world's first flexible grilling skewer**. After **FireWire®** was **awarded** in the U.S. several times*, now European judges discovered the ingenuity of the flexible skewer as well. **FireWire®** received a spot in the **TOP 10 innovations** category at the German grill and garden show (spoga&gafa) in 2010.

MALE KNITTING

Made of **special stainless steel**, **FireWire®** can take a lot of heat and is very long-lasting. Visually, it reminds one of a knitting needle. Just a little more stylish and something for the guys. The end of the skewer is good for skewering meat and veggies and also for turning the skewer while grilling. If one leaves the ends hanging over the grill's edge, it stays **cool to touch** and you can turn **FireWire®** over. One doesn't need any additional utensils, only **FireWire®** and some good meat. With its flexibility **FireWire® always finds its place**. No matter if the grill is small, large, rectangular or round.

EASY MARINATING

Marinating is easier as well. Assemble **FireWire®** with meat and veggies and then dip it into the marinade. With its flexibility, a fully equipped **FireWire®** can easily be placed in a bowl or bag. Its special stainless steel **guarantees perfect taste**, since it does not react to the marinade's sourness. And of course – it prevents rust and is dishwasher safe.

BORN 2 GRILL – ALL I WANNA DO IS BARBECUE

It's in to have a Barbecue. First session with the first sunbeams in spring. Last one when the leaves fall. Everywhere. In kitchens, gardens and on the beaches and meadows of this world. One can barbecue everywhere. And there are suitable grills for all these locations. Small round ones, big rectangular ones. And now there is also a skewer for all these grills and occasions. Due to its flexibility, FireWire® finds its place on every kind of grill. With a **length of 70cm** it sates even starving big boys. Alternatively it provides place for lots of healthy veggies – for the girls.

A bottle of wine as a bring-along-gift for the next barbecue? Not state of the art. **Bring FireWire®.** An ideal gift for a barbecue party with your friends. Or just as self-gratification for the guys. Either way, FireWire® is the perfect grilling utensil.
